## ISO 14001:2004

---

### INTERNAL AUDITOR COURSE

#### *Course Description*

This course provides participants with a comprehensive knowledge base to assist in the understanding of the **ISO 14001:2004** standard and its requirements. Through training in basic auditing principles, students will be given guidelines for establishing, carrying out and documenting audits of Environmental Management Systems. (EMS)

Participants will learn the specific requirements for **ISO 14001:2004** Environmental Management Systems, including the need for organizations to demonstrate the ability to sustain an ongoing commitment to consistently meet environmental and regulatory requirements. Risk analysis & Aspect & Impact analysis is discussed in detail as part of a 3 day course. (Optional)

The course material will outline the particular requirements for **ISO 14001:2004** elements.

Through workshops and exercises participants will learn to:

- Interpret the **ISO 14001:2004** requirements for their own company
- Increase their knowledge of planning and conducting audits
- Develop skills to participate in Internal Audits
- Work books will be provided containing all necessary course and reference materials.

#### *Who should attend?*

Individuals who will be responsible for implementation of the standard and conducting, managing or participating in the internal audits of their company's EMS.

#### *Prerequisite*

No prerequisite required

#### *Duration*

Two Days + 1 optional day (to address in detail risk assessment & Aspect & Impact Analysis).
